Oil Field Environmental Incident Summary

Responsible Party: MUREX PETROLEUM CORPORATION **Well Operator:** MUREX PETROLEUM CORPORATION

Well Name: MAXWELL JAMES 17-20H

Field Name: STANLEY Well File #: 24109

Date Incident: 3/21/2015 Time Incident: 18:34 Facility ID Number:

County: MOUNTRAIL Twp: 155 Rng: 91 Sec: 17 Qtr: NW NE

Location Description:

Submitted By: William Jansky Received By:

Contact Person: Shannon Holter

363 N. Sam Houston Pkwy. E.

Suite 200

HOUSTON, TX 77060

General Land Use: Cultivated Affected Medium: Topsoil

Distance Nearest Occupied Building: 2500 Feet

Distance Nearest Water Well:

Type of Incident: Valve/Piping Connection Leak

Release Contained in Dike: No Reported to NRC: No

Spilled Units Recovered Units Followup Units

Oil

Brine 40 Barrels 40 barrels

Other

Description of Other Released Contaminant:

Inspected: Written Report Received: 3/11/2016 Clean Up Concluded: 9/1/2015

Risk Evaluation:

None

Areal Extent:

Spill impacted the soil to the northeast of site. approximately 50-75 feet off of location.

Potential Environmental Impacts:

release impacted soil adjacent to a wetland. The impacted area will need to diked and cleanup start immediately to prevent wetland contamination.

Action Taken or Planned:

The leaking getty box valve was closed and valve on tank was also closed. Communicate with vendors that both valves need to be closed.

Wastes Disposal Location: TBD.

Updates

Date: 3/23/2015 Status: Reviewed - Follow-up Required Author: Roberts, Kris

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Release due to leak at the getty box. Flow/spray off location. Wetland threatened. Followup is necessary.

Date: 3/24/2015 Status: Inspection Author: Wax, Pete

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

On site 1200, off site 12:40. Snowing, 32 degrees, wind 5 mph from NE. Spill traveled north off well pad into agricultural field, then east, then southeast for a total distance of approximately 250 feet. Cleanup activities in progress at time of inspection. Cleanup included diking at head of spill to prevent further spreading and also harvesting of impacted soils. Leading edge of spill lies with 10 meters of the western edge of a wetland. Spill does not appear to have reached the wetland, and chloride tests support that hypothesis. Needs followup to ensure no legacy impacts to agricultural field.

Date: 9/1/2015 Status: Inspection Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location 12:22 9/1/2015.

No sign of residual impacts off of location. Vegetation has regrown in area, and adjacent field has a good crop.

No followup is necessary.
